

REFRIGERATED VAN SPECIALISTS

“Custom Built Insulated Liner”

VanLiner Technologies Inc. specialises in the conversion of cargo and cutaway vans into temperature controlled vehicles. We offer a unique custom built insulated liner package which can be custom made to suit all applications and temperature requirements.

PRODUCT FEATURES:

- ✦ Easy to clean white Exceliner interior grade panels (listed on Canadian Food Inspection Agency accepted construction materials)
- ✦ Extruded closed cell polystyrene insulation (r5 per inch) provides exceptional thermal characteristics and structural integrity.
- ✦ Lining system design follows vehicle contours to maximize payload.
- ✦ Quick install saves your company unnecessary off road time and van rental charges
- ✦ Options available include: PVC side and rear door freezer curtains, cargo control systems, food grade shelving, and a bathtub style polyurethane floor, which provides a water tight seal.
- ✦ Works with all major refrigeration brands.
